Review:

In 36 years of cleaning all kinds of firearms, I've not found any product that definitively removes all forms of bore fouling as much and as easily as this product combo. Try this and compare it to anything else. It is truly amazing. Virtually no odor and very little effort to get to virgin, bare metal.

Review:

Best Cleaning System Yet! I now use this exclusively on all my and customers guns. Easy, clean, and the best bore cleaning system ever. Buy this and you'll never buy another cleaner.

Review:

I have a .338 Win Mag that is prone to severe copper fouling. I have used both Sweet's 7.62 and Butches Bore shine on this barrel. They will do the job, but it takes patch, after patch, after patch for about an hour. I used USP paste and followed the directions off the back of the tube. It took two patches and less than 10 minutes and the bore on this rifle was clean!!! Absolutely no copper left. It is now my cleaner of choice. I use It on all my rifles.

I have been an FFL licensed dealer for 40 years and have tried almost every gun cleaning product on the market to clean both my own firearms and those of customers. I recently received a sample of your product that was sent to NRA Instructors, and thought I would try it on my own 'clean' guns. I could not believe the results, the amount of crud that the oil and paste removed was unbelievable, so I then began to clean all of my firearms with your products and now I feel that they are CLEAN. Also, I just received a shipment of your Score Big products to sell to my customers and have been telling them that this is the best that I have found. You can rest assured that this is the one I will be pushing the hardest. Thanks for a REALLY GREAT product.

I thought my guns were clean until I used USP Bore Paste and Gun Oil for really cleaning them. We have an underground shooting range and our newly clean guns shot very accurately.
