

USP CLEANER/DEGREASER™

PRODUCT INFORMATION

New *USP CLEANER/DEGREASER* was developed to be the best degreaser available. Our unique new formula was created in response to the need for a safe, CFC-free degreaser. It's excellent for cleaning dirt, dried lubricant and other residue from trigger mechanisms, actions and similar parts. It also can be used to remove oil from the bore.

USP CLEANER/DEGREASER is a 100% CFC-Free Formula, which contains NO 1,1,1, - Trichloroethane. Unlike antiquated degreasers with harmful chloro-fluorocarbons, it's a high tech alternative for environmentally-conscious consumers, making all other products obsolete.

Other multi-purpose CFC-free degreasers are becoming available, but they have the following drawbacks:

- Other degreasers do not completely evaporate. They leave behind a sticky film which can contain the material you were trying to remove.

USP CLEANER/DEGREASER completely evaporates, leaving a clean, dry surface.

- Some degreasers contain Hexane or Methanol which can be harmful to some finishes.

USP CLEANER/DEGREASER is safe for virtually all surfaces.

USP CLEANER/DEGREASER is the best degreaser available to the gunsmith and firearms enthusiast.

USP CLEANER/DEGREASER™

PRODUCT INFORMATION

Physical Properties:

Container	- Aerosol, with carbon dioxide propellant (10.5 ounce)
Contents	- A mild, petroleum distillate-based solvent
Appearance Flash	- Clear, water-white liquid
Point (TCC)	- 45°F(7°C)
Boiling Range	- 235°F(112°C)
Freezing Point	- -76°F(-60°C)
Aquatic Toxicity	- 96 hour LC50, fathead minnows: 0.490 mg/L
Evaporation Rate	- Slower than ether
Vapor Density	- Heavier than air
Vapor Pressure	- 31 mm Hg @ 77°F (25°C)
Specific Gravity	- 0.7227

***USP CLEANER/DEGREASER* answers the concerns of environmentally conscious users by offering the most innovative CFC-free degreaser available.**
